PROFESSIONAL SUMMARY

Cloud and System Engineer with 3+ years of experience in Linux system administration (Oracle Linux, RHEL, Ubuntu, CentOS), infrastructure monitoring, and DevOps practices in critical production environments. Strong skills in containerization (Docker, Kubernetes), scripting (Python, Bash), automation (Ansible, Terraform), and incident management. Hands-on experience with cloud platforms (OCI, AWS) and log ingestion tools. Currently pursuing a specialization in cybersecurity. Proficient in English and French.

PROFESSIONAL EXPERIENCE

Oracle 09/2022 – 10/2025

Cloud and System Engineer

- Administered and maintained multi-OS enterprise systems (Oracle Linux, RHEL, Ubuntu, CentOS, Windows Server) in critical production environments, ensuring high availability and performance for global clients.
- Implemented and maintained monitoring of critical infrastructure services; reduced mean time to resolution (MTTR) by 30% through proactive surveillance and log analysis.
- Automated system administration and deployment tasks using Python and Bash scripts and leveraged Ansible for configuration management and system provisioning.
- Led zero-downtime OS migrations (LEAPP) and patching campaigns, sustaining 100% service availability during critical maintenance windows.
- Strengthened security posture by driving urgent CVE vulnerability remediation and patch validation across production environments.
- Collaborated with DevOps and Cloud teams to improve CI/CD pipeline reliability and streamline production deployment processes.
- Produced detailed technical documentation, operational procedures, and post-incident analyses in compliance with ITIL best practices.
- Recognized as TTR Champion for consistently achieving the fastest resolution times and delivering responsive client support within SLA commitments.

Oracle 03/2022 – 09/2022

Software Engineer Intern

- Developed features for a Python-based automation tool, improving test coverage and consistency across Oracle projects.
- Performed unit testing, debugging, integration testing, and preliminary validation; fixed bugs to improve solution stability.
- Participated in code reviews and proposed solutions adhering to software engineering best practices.

Infosat 03/2021 – 06/2021

Web Developer Intern

- Designed and developed a merchandise transport web application using Spring Boot and Angular.
- Implemented backend/frontend features and optimized core transport management functionality, improving data accuracy and system responsiveness.

EDUCATION

ALX Africa — Cybersecurity Program 2026 – present

National School of Applied Sciences of Agadir — Engineering Degree in Computer Science (Bac+5) 2019 – 2022

Preparatory Classes for Grandes Ecoles — Physics & Engineering Science (PSI) 2017 – 2019

Aourir High School — Baccalaureate in Physics, Highest Honors, 2017

TECHNICAL SKILLS

Linux Systems: Oracle Linux, Red Hat (RHEL), Ubuntu, CentOS, Windows Server, Administration, services, logging

Containerization & Orchestration: Docker, Kubernetes, Docker Compose

Automation & IaC: Ansible, Terraform, Python scripting, Bash scripting

CI/CD & Version Control: Git, GitHub, CI/CD pipelines

Monitoring & Log Ingestion: Critical service monitoring, performance analysis

Databases: PostgreSQL, MongoDB

Cloud Platforms: Oracle Cloud Infrastructure (OCI), AWS

Networking: Network diagnostics, TCP/IP protocols, connectivity troubleshooting

Methodologies: ITIL, incident management, post-incident analysis, technical documentation

Cybersecurity: CVE vulnerability remediation.

CERTIFICATIONS

- Oracle Cloud Infrastructure 2025 Certified Foundations Associate
- Oracle Linux: System Administration on Oracle Cloud Infrastructure
- Linux: Multitasking at the Command Line
- Python Automation And Testing
